Business performance, finance, and strategy execution professional with 10+ years of experience helping companies translate strategy, numbers, operations, and reporting into measurable execution systems. Experienced across business planning, cost structure, CAPEX/OPEX, KPI monitoring, governance, reporting improvement, and cross-functional execution. Proven record in building new business lines, improving decision speed, strengthening operational visibility, and supporting leadership execution through clearer business control.

KEY BUSINESS IMPACT

- Built and operationalized a new mining contractor business line, converting 3.6M MT low-grade nickel material into sellable output while maintaining rehandling cost at around US\$2/ton.
- Supported the launch of an internal trading operation, scaling from 0 to US\$2.8M monthly revenue within 3 months and generating approximately US\$200K monthly margin.
- Reduced reporting cycle time from 4 hours to 5 minutes by improving data flow, reporting structure, and dashboard-based business visibility for faster management decisions.
- Improved decision cycle from 5 days to 1 day by strengthening governance, SOP structure, approval flow, document control, and cross-functional coordination.
- Supported operational scale-up from 3Mt to 7Mt output through stronger planning, performance monitoring, reporting visibility, and execution follow-up.

CORE SKILLS

Business Performance: KPI Monitoring, OKR, Balanced Scorecard, Executive Reporting

Strategy & Operations: Business Planning, Strategy Execution, Roadmap, SOP, Governance

Business Finance: CAPEX/OPEX, Cost Structure, Budget vs Actual, Cash Flow, Payback Logic

Reporting & Analytics: Advanced Excel, Google Sheets, Looker Studio, Power BI, Tableau, AppSheet

Improvement: Process Improvement, QC 7 Tools, ISO 9001:2015-based System, Document Control

PROFESSIONAL EXPERIENCE

Head of Strategy & Business Planning | PT Makmur Lestari Primatama — Jakarta

Jun 2022 – Nov 2025

Led business planning, performance monitoring, reporting system improvement, governance, and cross-functional execution across mining operations. Worked closely with leadership, finance, operations, commercial, contractors, and field teams to translate business direction into measurable execution.

- Built and operationalized a new mining contractor business line, converting 3.6M MT low-grade nickel material into sellable output while maintaining rehandling cost at around US\$2/ton.
- Supported the launch of an internal trading operation, scaling from 0 to US\$2.8M monthly revenue within 3 months and generating approximately US\$200K monthly margin.
- Reduced reporting cycle time from 4 hours to 5 minutes by improving data flow, reporting structure, and dashboard-based business visibility for faster management decisions.

Head of Strategy & Business Planning | PT Makmur Lestari Primatama — Continued

- Improved decision cycle from 5 days to 1 day by strengthening governance, SOP structure, approval flow, document control, and cross-functional coordination.
- Prepared business planning, feasibility logic, CAPEX/OPEX structure, cost-per-ton monitoring, payback view, SOP, scheduling, and stakeholder coordination for new business execution.
- Coordinated execution across operations, finance, commercial, procurement, contractors, and field teams to improve business visibility, cost control, and performance follow-up.

Business Data Analyst | PT Topindo Atlas Asia — Jakarta

Mar 2021 – Jun 2022

- Built sales and distributor performance dashboards to improve regional performance visibility.
- Defined KPI tracking with sales leadership to improve reporting consistency and performance monitoring.
- Analyzed sales and operational metrics to support faster and more accurate management decisions.

Data Analyst | PT Argapura — Tangerang

Jan 2018 – Oct 2019

- Analyzed operational data to identify inefficiencies in cost, quality, and delivery performance.
- Built reporting tools to support targeted performance improvement initiatives.
- Supported recurring operational visibility through structured data analysis and reporting.

Market Analyst | PT Presindo Central (Onyx Design) — Jakarta

Nov 2011 – Apr 2016

- Analyzed retail channel performance, product movement, pricing signals, and market opportunities.
- Supported data-driven product, pricing, and commercial decisions across retail channels.
- Built early foundation in market reading, customer behavior, channel visibility, and commercial analysis.
