Wildan Saefudin

Building New Businesses, Improving Profitability, and Driving Transformation in Mining & Industrial Sectors

Jakarta | 10+ Years Experience

Profile Overview

Strategy-to-execution leader with 10+ years of experience building new businesses, improving profitability, and driving transformation across mining and industrial sectors

Focused on delivering measurable business impact through transformation and performance improvement

- Build new business lines from 0 → **multi-million revenue**
- Drive cost efficiency and improve profitability across operations
- Build governance frameworks and operating systems that reduce dependency on individual decision-making
- Enable real-time decision making, reducing reporting cycle from **hours to minutes**

Core Expertise

Core capabilities across strategy, transformation, and performance management

Strategic Planning & Direction

- Shape **corporate strategy** and long-term business direction
- Align **business plans** with growth, profitability, and execution priorities

Financial & Business Analysis

- Build investment cases and CAPEX models to support strategic decisions
- Assess feasibility, profitability, and payback of high-impact initiatives

Business Transformation & Performance

- Lead cross-functional transformation initiatives end-to-end
- Improve **operational efficiency** and optimize cost structure

Data & Performance Management

- Design KPI systems and executive performance dashboards
- Enable faster, data-driven decision making across functions

Strategic Leadership Experience

PT Makmur Lestari Primatama — Strategic Management
2022-2025

- Lead strategic initiatives and transformation programs with **multi-billion IDR** investment impact
- Deliver end-to-end execution from concept to implementation across business lines
- Build and scale revenue-generating businesses, operating structures, and management systems
- Partner directly with Director level to drive high-impact strategic decisions

Key Scope & Exposure

- Manage projects up to **IDR 50B+ CAPEX** investment
- Lead cross-functional teams of **150+ personnel**
- Operate across **multi-site operations (Sulawesi)**
- Drive strategy, operations, commercial, and data transformation initiatives

Key Transformation Project

New Business Line Creation & Cost Transformation (Nickel Mining)

*Built a **new revenue-generating business** from **3.6M MT low-grade nickel** (IDR 50B+ CAPEX)*

BUSINESS CHALLENGE

- Low-grade nickel (<0.9) treated as non-commercial waste
- ~3.6M MT stockpiled with **zero economic value**
- High contractor dependency driving **elevated handling cost**
- No internal capability to process or monetize material

STRATEGIC EXECUTION

- Develop full business case and financial model (CAPEX, OPEX, payback)
- Lead vendor sourcing, negotiation, and end-to-end project commissioning (~5 months)
- Build in-house operations and eliminate contractor dependency
- Design SOP, operating model, and cost control system
- Build and lead team of 150+ personnel

BUSINESS IMPACT

- Transform non-commercial waste into a revenue-generating asset
- Monetize **~3.6M MT** previously idle material
- Reduce handling cost by **~$1/ton**
- Establish a new business line with **IDR 50B+ CAPEX investment**
- Sustain stable operations for **1.5+ years**

Key Organization Transformation

Transforming a Founder-Dependent Organization into a System-Driven Operation

*Transformed a **founder-dependent organization** into a **structured, system-driven operation***

BUSINESS CHALLENGE

- Decision-making centralized at Director level, creating **bottlenecks**
- No formal organizational structure or role clarity
- Absence of SOP and governance framework across operations
- High dependency on individuals, limiting scalability

STRATEGIC EXECUTION

- Design and implement organizational structure across functions
- Establish Strategic Management Division to drive execution governance
- Develop SOP, governance frameworks, and operating procedures
- Implement ISO 9001 & 14001 standards across operations
- Define roles, responsibilities, and performance accountability systems

BUSINESS IMPACT

- Reduce decision-making cycle from **5 days → 1 days (80% faster)**
- Accelerate execution from **2 weeks → 1 week (50% faster)**
- Establish governance framework across **12 business units**
- Increase process compliance to **90% organization-wide**
- Enable scalable operating model to support **2x business growth**

Key Commercial Launch

Built a new trading business from zero to $2.8M monthly revenue in under 3 months

End-to-end commercial setup including sourcing, pricing, and execution

BUSINESS CHALLENGE

- No existing trading business, team, or operating structure
- No supplier network or sourcing pipeline established
- Absence of SOP, pricing strategy, and transaction flow
- Limited internal capability to execute trading operations

STRATEGIC EXECUTION

- Design and implement end-to-end trading model and operating structure
- Build supplier network and secure sourcing pipeline across regions
- Develop SOP, pricing mechanism, and transaction processes
- Establish coordination across operations, logistics, and commercial teams
- Launch trading operations within <3 months

BUSINESS IMPACT

- Generate **$2.8M monthly revenue** within 3 months
- Achieve **~$200K** monthly gross margin
- Scale trading volume to 100K MT/monthly
- Establish **multi-region trading operations**
- Establish f**ully integrated trading operations** across sourcing, logistics, and commercial functions

Key Data Transformation

Enable real-time decision making by building end-to-end data and performance systems

Integrating data, dashboards, and governance into a unified system

BUSINESS CHALLENGE

- Reporting process fully manual, time-consuming, and error-prone
- No centralized database or standardized data structure
- Lack of visibility into real-time operational performance
- Decision-making delayed due to slow reporting cycle

STRATEGIC EXECUTION

- Design and build centralized database to integrate operational data
- Develop 30+ dashboards across operations, commercial, and management
- Establish KPI framework and performance monitoring system
- Implement data governance and reporting standardization
- Drive organization-wide adoption of data-driven decision making

BUSINESS IMPACT

- Reduce reporting cycle from **4 hours → 5 minutes (98% faster)**
- Enable real-time visibility across **10 business units**
- Increase reporting efficiency by **80% through automation**
- Improve decision turnaround speed by **80% across management levels**
- Establish data-driven system adopted across **95% of the organization**

Executive Summary

Strategy-to-execution leader delivering business growth, transformation, and operational excellence

CORE VALUE

Strategy-to-execution leader with 10+ years of experience building businesses, improving profitability, and driving transformation across mining and industrial sectors

KEY IMPACT

- Build → **New business line (IDR 50B+ CAPEX, 3.6M MT)**
- Scale → **$2.8M/month revenue trading business**
- Transform → **80% faster decision-making organization**
- Enable → **98% faster reporting with real-time data systems**

DIFFERENTIATOR

Combines strategy, execution, commercial delivery, and data systems to drive end-to-end business transformation

Thank you

Open to discussing how I can contribute to driving business growth and transformation
